

Math 10-3 (5 Credits)

Course Description

This course is designed for students planning to enter the majority of trades or the workforce immediately after high school. This course includes topics such as finance, geometry, measurement and trigonometry. As you can see from the diagram below, the content of the three course sequences (-1, -2, -3) differ so students gain necessary knowledge, skills and attitudes to be successful both in the workplace and in a variety of post-secondary programs.
